in bile duct injury

BILIARY RECONSTRUCTION

now its the matter...

CRESCENT GASTROLIVER
& GENERAL **HOSPITAL**

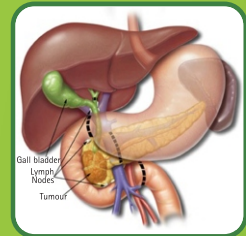

Bile duct injury is a recognized complication of cholecystectomy both in laparoscopic and open; though rare but it is one of the worst iatrogenic complications of these surgeries.

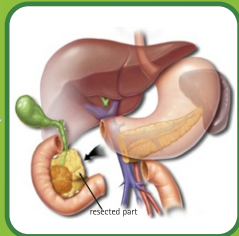

Prompt recognition & active management affects the morbidity; in fact suboptimal treatment can result in biliary peritonitis, sepsis, multi organ failure even death.

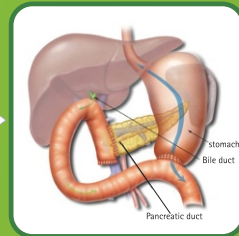

Biliary Reconstruction Process

Organs to be desected

Desected Organs

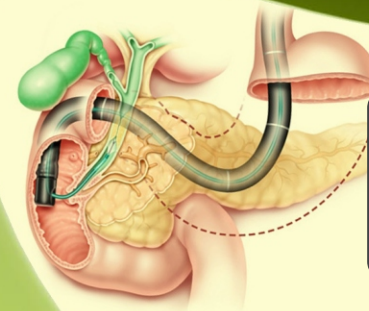

Successfully Reconstructed

BILIARY RECONSTRUCTION for

- ◀ Bile duct leakage
- ◀ Biliary Peritonitis
